Dear Bill,

Thank you so very much for designing, purchasing materials, and building the cabinet, shelving units and wooden screens for our office. We are very impressed with your work – it is all beautiful and will be such an asset to our office.

As our programs and outreach continue to grow, so does the amount of supplies that our programs use to assist teachers and improve student achievement in Greenville County Schools. We lack storage closets, so the storage units are much needed and will be much appreciated. In addition, our organization has been increasing the number of meetings we host for teachers and members of the community. Because of this, an increased number of chairs must be on hand to allow for larger meetings, so the screens you have built will allow for these extra chairs to be hidden during the normal course of the day. As you know, the work environment is related to productivity, so we are certain to be more productive.

Your donation helps ensure that more of the monetary donations we receive can go directly into the classrooms where they do the most good. Please share our deep gratitude with all of your members who assisted in this project.

Thank you, again, so much for your support.

Sincerely,

Grier Mullins
Executive Director
